

Mozilla Gecko Driver

NOTE: Current instructions are for version 0.24.0. You can download the latest one.

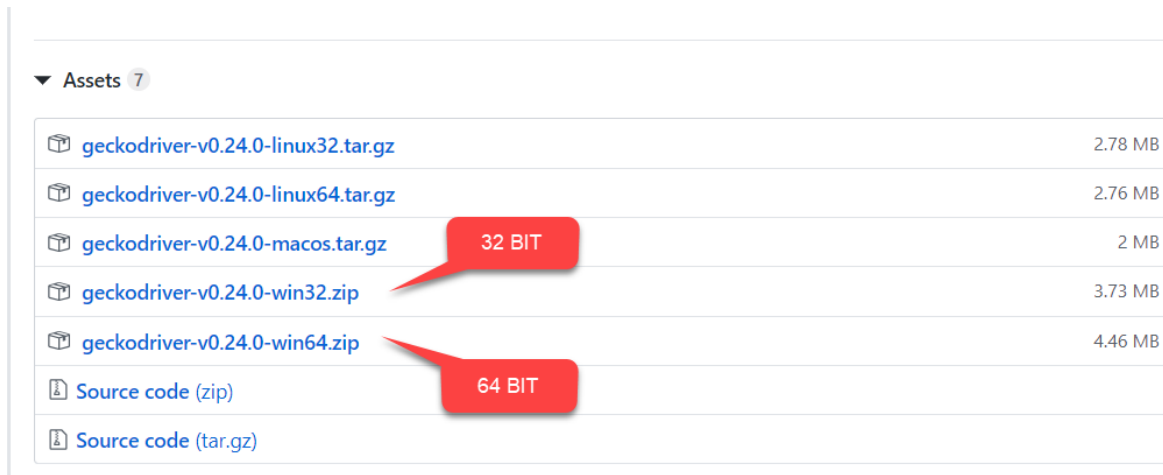

1. Go to the Link:

<https://github.com/mozilla/geckodriver/releases>

2. Select v0.24.0

2. Scroll down and download [geckodriver-v0.24.0-win32.zip](#) or [geckodriver-v0.24.0-win64.zip](#) based on the system's architecture.

3. This zip folder contains .exe file, which will be used in Eclipse. Just remember the path where you saved the folder. Instructor will explain how to import it in the program.
